

To Whom it may concern:

We contracted with Spycentre to install camera's in our offices in Richardson, Texas in January of 2013. They're team did an outstanding job of reviewing our plans and setting the expectations up-front with cabling, computers, etc. We were very pleased with the work, the price, and most importantly the patience they had in working around our jobsite. Since that installation we have had them back at our office again to install additional cameras and upgrade our computer. The appreciation doesn't stop there...I personally had Spycentre install a full camera system in my home and they again did an outstanding job.

Thank you Brian Frazier and your team at Spycentre.
