To Whom It May Concern:

Sequoia Real Estate Management manages A+ apartment communities throughout Plano, Frisco and Lewisville Texas. Our communities appeal to renters who not only expect the best but they demand it. In an effort to provide the best quality of life for each of our renters we utilize video surveillance systems to monitor all of our common areas. The team at Spy Center has installed their system on four of our communities. The DVR system that they installed is a great tool for the office staff. The system is easy to use and the cameras provide great video surveillance of the areas selected. The system uses a monitor for viewing; however, each office computer can be set up to view the same locations as the monitor. This has been a great product and allows us to monitor the pool area from our desks. The system we chose to use also stores the video captured for two weeks. The team at Spy center is very knowledgeable and helpful with explaining the system. If you are considering installing any sort of video surveillance I would highly recommend the DVR system from Spy Center.

Respectfully,

Elizabeth J. Francisco
